

# L18

NLP Intro  
Bag of words  
TFIDF

# Optional HW

For a given dataset (references in the notebook) experiment with text features:

- Try to make text features with the use TF-IDF
- Experiment with dimensionality reduction for text features
- Experiment with filtering stopwords, most frequent words, rare words, investigate special lexic and special word abbreviations
- Build regression / classification model with and w/o text features, compare results
